### INSPECTION AND SUPERVISION OF FOOD.

#### (a) Milk.

The supervision of milk and dairies is now undertaken by the Ministry of Agriculture, and statistics are available only for the West Riding as a whole.

#### (b) Meat and other Foods.

The report of the meat inspector is as follows:—

Veterinary Infirmary,  
Newcastle Street,  
Worksop.

September 1st, 1944.

Dear Sirs,

I am pleased to report on the Meat Inspections carried out at Tickhill during the year January 1st to December 31st, 1943.

Considering the times, the supplies have been as good as one could expect, and fairly constant. Comparatively small quantities have been condemned as unfit for human food. This has only occurred, either owing to the effect of a short spell of unfavourable weather, or occasionally to meat apparently removed too long from the refrigerators before delivery to the shops. Some has also been soiled, but more care has been stressed to avoid this happening.

I feel justified in stating, that in my opinion, the supply has been, on the whole, satisfactory.

Yours faithfully,

THOS. BOWETT, M.R.C.V.S.,

**(c) Adulteration, etc.**

The Acts governing the adulteration of food are administered by the West Riding County Council. The area is served by a District Sampling Officer stationed at Rotherham.
